

## **La Costa Avenue Improvement Plan Summary of April 28, 2011 Community Meeting and Workshop**

Over 100 members of the Carlsbad community attended the April 28 meeting for the La Costa Avenue Improvement Plan. This was the first in a series of three community workshops to develop the ultimate plan for La Costa Avenue between El Camino Real and Rancho Santa Fe Road. City staff and their consultant presented an overview of the project, a summary of responses to the community survey, and a description of the devices and options the city is considering for use in developing the La Costa Avenue Improvement Plan. Participants were then invited to visit various work stations to identify specific issues and concerns along La Costa Avenue and consider the different types of improvements under consideration. Participants were also asked to complete a comment sheet to provide additional information on the issues, what they like or don't like about various devices, and what they consider is important in developing a successful plan for La Costa Avenue.

The information from the April 28 meeting will be used to develop concept plans that will be presented for discussion at the May 27 community meeting. The focus of the May 27 meeting will be to discuss the advantages and disadvantages of different concepts and to consider how each advances an ultimate vision for La Costa Avenue.
